ALFA XILLO

L'arte del legno by alfa wood

Alfa Wood Group loyal to current trends, innovates once again with the new L'arte del legno 2023 collection, consisting of a complex of geometric shapes of natural veneer, cut and sewn by hand, that create the subtle illusion of movement with three-dimensional patterns.

The designs are inspired by geometry, combining natural wood colors on a two-dimensional level. Simple geometric forms are imprinted on the surfaces, creating the illusion of alternate designs visible to the viewer after rotation and observation of pattern development.

This way, the viewer is in a playful relationship with the design, as his perspective places it in space.

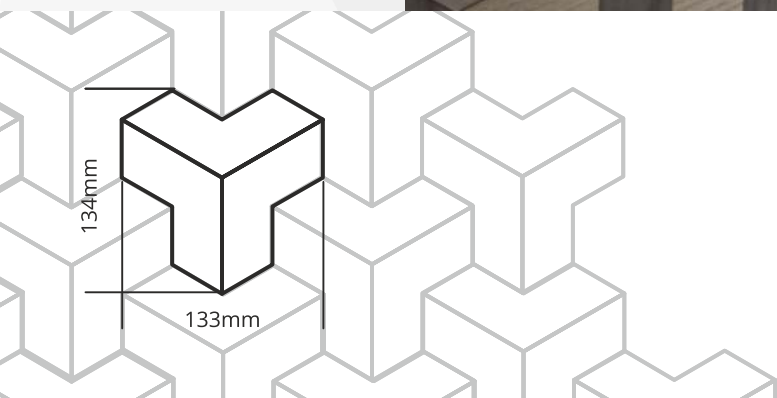

The following surfaces have many decorative applications and uses, such as:

- Furniture manufacturing (dining rooms, sideboards, table tops, etc.)
- Interior doors
- Cabinet doors
- Wall cladding
- Special constructions: such as bed headboards, stairs, art, musical instruments, etc

Available dimensions: 3050x1220mm, 2440x1220mm

Intarsio by alfa wood

The Intarsio 2023 collection consists of handmade marquetry in various veneer qualities and designs, focusing on simplicity, clean lines and highlighting the natural beauty of wood.

Intarsio collection represents classic designs of the traditional decorative art of marquetry. Meticulously selecting the natural veneer and by the right design, focusing especially on the wood grains & textures, the desired handmade design is highlighted.

The art of marquetry requires inspiration and passion, attributes on which Alfa Wood Group is particularly distinguished – along with your vision we can create unique designs with your own veneer choices.

Marquetry has many decorative applications and uses, such as:

- Furniture manufacturing (dining rooms, sideboards, table tops, etc.)
- Interior doors
- Cabinet doors
- Wall cladding
- Special constructions: such as bed headboards, stairs, art, musical instruments, etc
